**A documentation
of
Plant diversity of JSS Women's institutions complex
Saraswathipuram, Mysore -9**

JSS Women's Institutions complex shelters institutions ranging from Kindergarten to PG level. Besides this, the campus also hosts D.Ed and hostels for college students, children and working women. The campus covers an area of around 8 acres. It is located near the campus of University of Mysore.

Biodiversity is the most important natural resource for the survival of living organisms including humans. The institution is committed to preserve the biodiversity. The campus is lush green with rich plant wealth of highly diversified plants. They range from herbs to trees, ornamental to medicinal plants, huge palm trees, green lawns, attractive flowering plants which have enhanced the beauty of the campus.

JSS College for Women established in 1971, dedicated to women's education, is a prestigious institution in this complex. The department of Botany has taken up the task of documenting the plant diversity of the campus. It helps the students to acquire intimate knowledge about plants in the campus, creates awareness on conservation of plant species. Above all, it serves as an academic guide for Botany students to locate, understand and in the identification of the plants and acquire in-depth knowledge on the Biology of plant and animal wealth.
