Awareness program on “Water conservation for future sustainability” to the mark the occasion of World Water Day 2026

Date: 01/04/2026

Place: Navajyothi Auditorium

Number of beneficiaries: 150

Objectives:

- Change daily water use Behavior
- Promote rainwater harvesting adoption
- Ensure sustainable water management practices
- Build community responsibility and action
- Secure future water availability

Resource Person Name: Prof. Shamsundar Subbarao

Designation: Associate Professor, Dept. of Mechanical Engineering,
Head, NIE- CREST,

Organization: NIE College

Brief Write up on the Programme:

The Awareness program on “Water conservation for future sustainability” was organized by Department of Botany.

The resource person, Prof. Shamsundar Subbarao, delivered an insightful session focuses on promoting sustainable use of natural resources and ensuring water security for future generations. As an expert in renewable energy and sustainability, he emphasized the integration of practical solutions with community participation.

The programme highlights the urgent need to conserve water in the context of increasing scarcity and climate change. It educated students on simple yet effective methods of rain harvesting, efficient water usage, and reuse of wastewater. Prof. Subbarao opined adopting decentralized and ecofriendly technologies that can be implemented at household and community levels.

Special importance is given to rainwater harvesting as a sustainable solution, with examples showing that even individual households can collect significant amount of water annually.

The programme encouraged behavioral change urging people to reduce wastage and take responsibility for conserving water resources.

An interactive discussion was held where students actively participated and shared their views and experiences. The resource person addressed queries and provided practical suggestions

Outcomes:

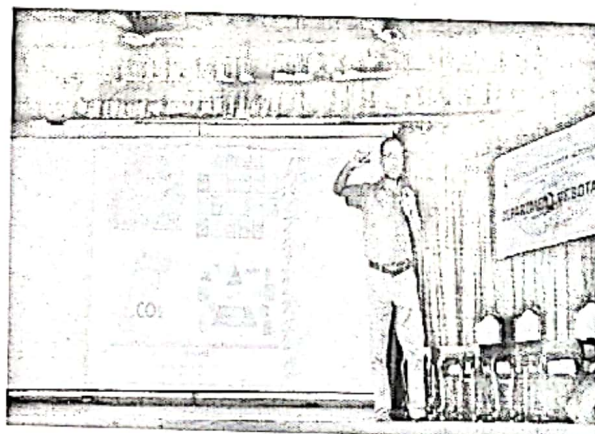

- Encouraged students to adopt strict water-saving habits leading to immediate and measurable reduction in water consumption.
- Promoted rainwater harvesting adoption.
- Built Community responsibility and action.
- Sustainable use of water resources.

How would you rate this water conservation initiative/Program?
67 responses

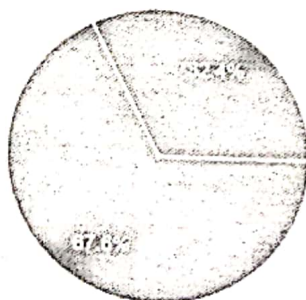

- Excellent
- Good
- Average
- Poor

The objectives of this program (saving water for future sustainability) were clearly explained by the resource person
68 responses

- Excellent
- Good
- Fair
- Poor

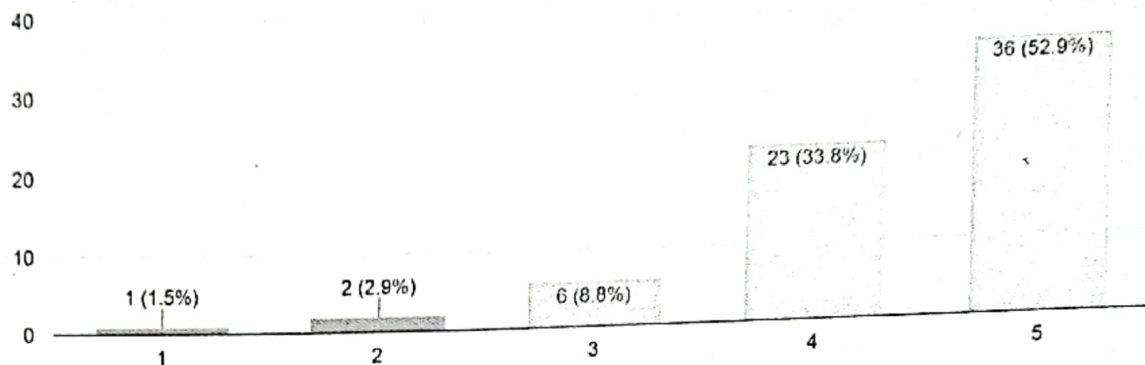

The understanding of water conservation via activities/resources used (E.g., Poster)
68 responses

- Very Useful
- Useful

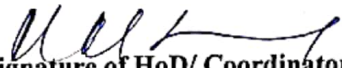

Overall, how would you rate this water conservation initiative?

68 responses

Impact:

The awareness programme on water conservation created a positive and lasting impact by improving knowledge on water scarcity and encouraged responsible usage. The program also strengthened community participation and promoted sustainable management of water resources. Overall, it contributed to environmental protection and increased awareness about ensuring water availability for future generations.
